

COURSES LEADING TO THE BCS CERTIFICATE IN INFORMATION SECURITY MANAGEMENT PRINCIPLES (CISMP)

AMBERHAWK

**CISMP
FROM AMBERHAWK TRAINING LIMITED
MAY 2017**

CERTIFICATE IN INFORMATION SECURITY MANAGEMENT PRINCIPLES (CISMP)

Main course contents at a glance

The course covers: information assurance concepts and definitions; the need for & benefits of information security; information risk; threats to & vulnerabilities of information systems; risk management; options for dealing with risk.

Information Security organisation and responsibilities include the legal framework; security standards and procedures, training Investigations & forensics, responsibilities of managers, security staff, information asset owners, users, contractors and their staff.

Security controls considered in the course relate to: physical and environmental issues personnel; user access and passwords; protection from malicious software networks, communications; external services and contractors and cloud computing and the role of cryptography. There is a session on disaster recovery and business continuity management.

Software development is considered in the context of: testing, audit & review and systems development & support.

Comprehensive revision material and mock exams are provided.

Links are made throughout the course to the Code of Practice on Information Security Management (ISO27002), the Government's Information Assurance Maturity Model and Assessment Framework, the Local Government Data Handling Guidelines and the HMG Security Policy Framework.

Course Structure

ISM Day 1	Legal Drivers with respect to Information Security Management
ISM Day 2	Risk, Incident Reporting and Business Continuity Management
ISM Day 3	Management, Employee Responsibilities and Training
ISM Day 4	Controls (Physical, Access Control, Software production etc)
ISM Day 5	All about Networks (Malware, Cloud, Cryptography)
Mock exams	Mock exams done at the delegates own time before the exam
BCS exam	Exam afternoon

Target delegates

Data Protection Officers, FOI officers, corporate governance, IT staff and Information Law lawyers who want an appreciation of the Principles underpinning Information Security Management and how these Principles relate to the Code of Practice on Information Security Management (ISO27002), the Government's Information Assurance Maturity Model and Assessment Framework, the Local Government Data Handling Guidelines and the HMG Security Policy Framework.

Cost and location

The course is being held in central London (Regus "City Point" offices; near Moorgate Tube in the City of London). The cost is £1795 + VAT per delegate.

The course is held about two times per year. Details of course dates in London can be found on the Amberhawk web-site (<http://www.amberhawk.com/informationsecurity.asp>).

More details on the CISMP syllabus

Unlike other course providers who have the exam at the end of a 5 day course, we provide a Mock exam of over 200 questions, time for delegates to prepare properly for the real exam, and a "warm up" exercises on the day of the exam.

The course follows the latest BCS syllabus and prepares candidates for the 2 hour multiple choice BCS examination which is sat on the afternoon of the last day of the course.

Details of the Certificate in Information Security Management Principles can be found on the BCS web-site on: <http://certifications.bcs.org/content/conCertification/6>.

If you have any specific requirement or query re the Course, please email: info@amberhawk.com.

Do not want to travel to London? Try on-site training

This 5 day CISMP course can be held on-site. As you can get an audience from as many organisations as you want, such on-site arrangements can become very cost effective, as the cost per qualified delegate (including exam fee) can be under £900 (+VAT) each. On-site training means that the trainer takes the strain of the train and travel (and not your delegates).

If interested on an onsite course, please email: info@amberhawk.com.

TERMS & CONDITIONS

Booking
